This letter is to confirm that the product named : “No-Fed-Bear” passed the MTDC impact and inspection test and did pass the Grizzly and Wolf Discovery Center live bear test. Figure 1 Below shows the latest version of that canister. The lid is held in place using two quarter turn locking fasteners. The canister passed the MTDC The container survived 1 hour of bear time at the Grizzly and Wolf Discovery Center and was also tested at Casey Anderson’s Montana Grizzly Encounter facility.

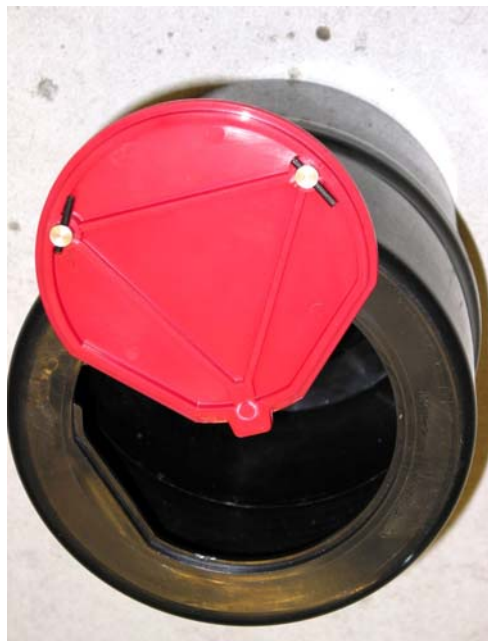

Figure 1 and 1a. Lid fastening system uses 2 locking quarter-turns.

Canister Dimensions:

8.0" diameter top and bottom

8.5" diameter center

10.0" high

Wt – 2.4 lb.

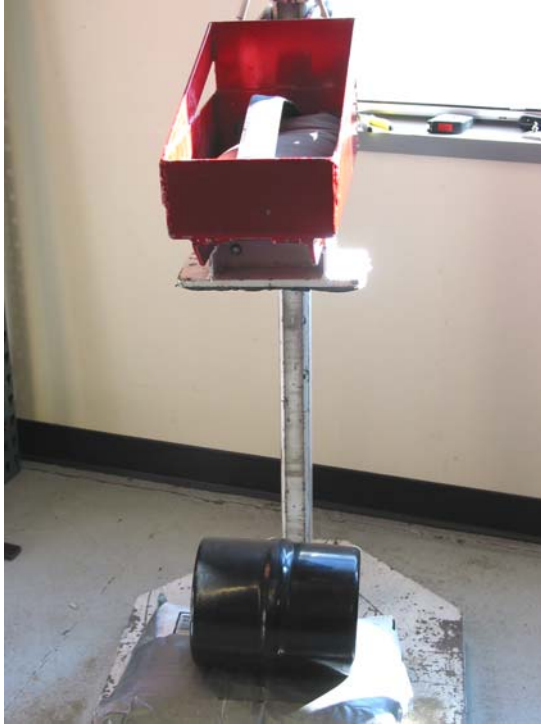

Figure 2. No-Fed-Bear Canister on MTDC Impact Test Stand

A penetration force of 200 lbs was applied to the box with no penetration thus was adequate to meet the 135 lb load required by the test protocol.

The No-Fed-Bear Canister passed the live bear test with more than 1 hour of bear exposure which is the requirement in the test. The canister was also tested at Casey Anderson's Montana Grizzly Encounter facility. The photo below shows a typical bear resistant cooler being tested at the Grizzly and Wolf Discovery Center.

Figure 3. A Cooler being tested at the Grizzly & Wolf Discovery Center.

Sincerely,
